

## VISION HOME DIGITAL LEFT

Vision Home is an electrical handle for use on the inside of a balcony or patio door or a window with concealed screws.

The lock is suitable for both in and outward facing doors and windows and the handle is run on two AAA batteries (not included). You lock the handle by swiping your finger over the digital panel and simply unlock by entering your six digit code. The background panel is lit and provides visual feedback when using the handle. The code of your choice remains the same when the batteries are changed or a power shortage should occur. It's easy to change the code should you want to.

The lock is approved according to Swedish standard 3620:2017 – class B, which is what is required for insurance companies for locking av patio doors.
